

## Job Openings in the Division of Diabetes, Endocrinology and Metabolic Diseases, National Institute of Diabetes and Digestive and Kidney Diseases

The National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK), a component of the National Institutes of Health (NIH), issues grants in support of biomedical and behavioral research across the country, and is looking for strong leaders to support this effort.

Are you an experienced Physician Scientist in search of an exciting career opportunity? We may be the right place for you. The NIDDK is seeking a talented Medical Officer (MD or equivalent) with expertise relevant to diabetes research to manage clinical studies related to the pathophysiology, prevention and treatment of diabetes and its complications. This position offers unique and exciting opportunities to provide scientific leadership and to administer grants in support of diabetes research in the US.

### Current Opening

**We are looking for applicants with significant research experience, who have a commitment to excellence, and the energy, enthusiasm, and innovative thinking necessary to lead dynamic and diverse programs.**

NIDDK is seeking an exceptional physician scientist to serve as Medical Officer in the Division of Diabetes, Endocrinology and Metabolic Diseases (DDEM). The DDEM supports and provides leadership for research on the causes, prevention, and treatment of diabetes and its complications, as well as other endocrine and metabolic diseases. We are recruiting a Medical Officer for the Diabetes Clinical Trials Program. Successful candidates will be responsible for the scientific and administrative management of a portfolio of multi-center and single center clinical studies and clinical trials on the prevention and treatment of diabetes, and for developing joint research activities and partnerships with other government organizations.

The physician scientist must have the knowledge and insight needed to identify important scientific opportunities and to participate in the design of clinical trials or observational or mechanistic studies. The Medical Officer will provide oversight of clinical research studies, including: deciding if proposed tests and interventions are appropriate for clinical studies participants; analyzing recruitment, retention and adverse events; identifying strategies to address study problems; recommending whether research protocols should continue; and providing guidance on what ancillary studies could be added to leverage the patient population and existing infrastructure of the studies.

An appropriate applicant must possess an MD or equivalent degree, and expertise in endocrinology, internal medicine or another specialty relevant to diabetes. Strong candidates should have conducted independent research, and possess the knowledge and insight needed to identify important scientific opportunities in diabetes research and to participate in the design of clinical trials, observational studies and ancillary studies.

The salary range is \$123,758 to \$155,500 per annum, commensurate with qualifications and professional experience, with the potential for an additional Physician's Comparability Allowance of up to \$30,000. A full Civil Service benefits package is available that includes retirement (401K equivalent), health, life and long-term care insurance.

**If you are ready for an exciting scientific leadership opportunity**, and would like to know more about this position, please contact: [niddkdemjobopenings@mail.nih.gov](mailto:niddkdemjobopenings@mail.nih.gov)
