

**Dr. Carmella Evans-Molina** is the Eli Lilly professor of pediatric diabetes at the Indiana University (IU) School of Medicine in Indianapolis, where she serves as the director of the IU Center for Diabetes and Metabolic Diseases and as a staff physician at the Roudebush VA Medical Center. Dr. Evans-Molina serves as a co-executive director of the Network for Pancreatic Organ Donors with Diabetes (nPOD) and as a co-PI of the NIH Integrated Islet Distribution Program. She is an investigator in the National Institutes of Health (NIH)–funded Type 1 Diabetes TrialNet, Rare and Atypical Diabetes (RADIANT) Network, and Type 1 Diabetes in Acute Pancreatitis Consortium. Dr. Evans-Molina earned her M.D. from Marshall University in West Virginia and her Ph.D. from the University of Virginia (UVA). She completed her residency training in internal medicine at Massachusetts General Hospital and subspecialty training in endocrinology and metabolism at UVA. Dr. Evans-Molina’s basic science research is focused on understanding how impaired calcium handling in the secretory pathway contributes to  $\beta$  cell dysfunction in diabetes. In addition, she has a clinical research interest focused on defining the natural history of  $\beta$  cell loss in type 1 diabetes and the use of -omics approaches to identify novel serum biomarkers of  $\beta$  cell stress in pre-symptomatic diabetes. Her research is funded by the NIH, the Department of Veterans Affairs, and the Juvenile Diabetes Research Foundation.
