

Hila Milo Rasouly, Ph.D., M.Sc., CGC, is an associate professor of medical sciences and Associate Director of Education of the Center for Precision Medicine and Genomics at Columbia University. She has a master's degree in genetic counseling and a doctoral degree in genetics and genomics. Her research interests are focused on the implementation of genomics in nephrology. She has extended experience with the return of individual genetic results to participants enrolled in nephrology biobank studies and those enrolled in the eMERGE Phase III study, which led her to author multiple publications on the subject.
