

How to Help Your Children Stay Healthy

Tips to Lower Their Chances of Getting Type 2 Diabetes

This tip sheet is for parents who have kids that are 8 to 12 years old. It tells you about type 2 diabetes and why some kids have more chance of getting diabetes. It also gives you great ideas about how you can help your kids be active and eat healthy foods.

What is type 2 diabetes?

Type 2 diabetes is a serious disease. It means that your blood sugar levels are too high. If your blood sugar levels stay too high for too long, it can damage your heart, eyes, kidneys, nerves, and even your teeth and gums. In the past, only adults got type 2 diabetes. Now some children and teens are also getting type 2 diabetes.

What makes some kids more likely to get type 2 diabetes than other kids?

- Having a mom, dad, sister, brother, or other family member with diabetes
- Being overweight
- Not being active
- Weighing 9 pounds or more at birth
- Being born to a mother who had diabetes during the pregnancy
- Being an American Indian, Alaska Native, African American, Asian American, Hispanic/Latino, or Pacific Islander

Help your kids be active.

Take your kids grocery shopping.

Find fun ways to be active.

What can you do?

- Help your children be active each day.
- Make meals and snacks that are healthy and taste good.
- Take your kids grocery shopping. Teach them how to read food labels to help find healthy foods.
- Limit portion sizes of foods high in fat, sugar, and salt.
- Limit your kids' play time in front of the computer, tablets, smartphones, and TV to 2 hours per day.
- Ask the doctor if your kids are at a healthy weight and if they have a greater chance of getting type 2 diabetes.
- Be a good role model. Eat healthy foods and be active with your kids.

What can kids do to be healthy?

- Be more active.
- Eat well.

How can your kids be active?

Ask your kids how they like to be active. What is fun for them? If they don't have ideas, you can suggest that they:

- Ride a bike
- Jump rope
- Dance
- Swim
- Shoot hoops
- Go for a walk or run with a parent or older family member
- Skateboard

How much activity should your kids get?

Your kids need about 60 minutes of activity a day. They don't have to do it all at once. For example, 20 minutes at a time, 3 times a day is fine.

Have your kids start out slow. Support them. Let them know the important thing is to just keep moving! They can add more activity each week.

How will being active help?

Being active can help your children:

- Build muscle and burn off extra fat.
- Grow strong bones and stay flexible.
- Feel good and sleep better.
- Be at a healthy weight.

Make healthy meals together.

How can your kids eat well?

They can:

- Make good food choices.
- Eat healthy snacks.
- Adopt healthy eating habits.

What are good food choices?

Talk with your kids about how they think they can eat healthier. Make a list together. Here are some tips you might want to include:

- Eat foods that are high in fiber such as whole grain breads and cereals, brown rice, lentils, beans, fruits, and vegetables.
- Eat foods low in saturated and *trans* fats such as lean meat, chicken without the skin, fish, and non-fat or low-fat milk, yogurt, and cheese.
- Eat baked, broiled, or grilled foods instead of fried foods.
- Eat foods that are low in salt such as fruits, vegetables, and whole grains. Do not add salt to your foods.
- Eat lots of vegetables. For example, make a salad with leafy greens, carrots, tomatoes, and peppers. Use 2 tablespoons or less of a low-fat dressing.
- Drink water instead of sugary drinks such as soda, sport drinks, and fruit juice.

What are healthy snacks?

Here are some easy, healthy snacks:

- A piece of fruit such as an apple or banana
- A slice of toast with 1 tablespoon of peanut butter
- A cup of low-fat or non-fat yogurt
- Raw vegetables such as carrots or celery with salsa

What are healthy eating habits my family can try?

You can:

- Eat breakfast, lunch, and dinner every day.
- Limit portion sizes when eating a meal. Fill half of your plate with fruits and vegetables. Fill one quarter with a lean protein, such as chicken or turkey without the skin or beans. Fill one quarter with a whole grain, such as brown rice or whole wheat pasta. Drink a cup of low-fat or non-fat milk with your meal.
- Limit desserts such as cookies and ice cream to only 1 or 2 times a week.
- Turn the TV and other devices off during meals. Enjoy eating and talking with family members.

Limit portion sizes.

An easy snack recipe that parents can make with kids:

Fruit Smoothie

- 1/2 cup of low-fat or non-fat plain yogurt
- 1/2 cup to 1 cup of skim milk
- 1 cup of frozen fruit (try strawberries, blueberries, or peaches)
- 1 banana

Place yogurt, fruit, and milk into a blender. Mix until smooth. Pour into glasses to serve. Get creative and ask your kids to think of other fruits to add.

Things to Remember

- There are ways you can help your kids stay healthy and lower their chances of getting type 2 diabetes.
- Try the ideas in this tip sheet.
- Find out how your kids like to be active and support them in their efforts.
- Talk to your kids about how your family can eat healthy foods.
