

Network of Minority Health Research Investigators (NMRI)

NMRI 14th Annual Workshop

April 20 – 22, 2016 | Bethesda, MD

What is NMRI?

[The Network of Minority Health Research Investigators \(NMRI\)](#) was established by the [Office of Minority Health Research Coordination \(OMHRC\)](#) of the [National Institute of Diabetes and Digestive and Kidney Diseases \(NIDDK\)](#).

Through NMRI, NIDDK elicit recommendations for strategies to enhance the opportunities and implement mechanisms for support of minority investigators in biomedical research. NMRI advances scientific knowledge and contributes to the reduction and eventual elimination of racial and ethnic health disparities.

Who Attends?

- Network of Minority Health Research Investigators (NMRI) members
- Underrepresented minority investigators, including post-graduate doctoral students, who are conducting biomedical research in the fields of:
 - diabetes, endocrinology, metabolism
 - digestive and liver diseases, nutrition
 - kidney, urologic, and hematologic diseases.

How do I attend?

To attend, fill out the Enrollment Form.

What happens at the meeting?

- Mentorship
- Poster Presentation
- Scholarly exchange among field leaders

Can I submit an abstract for the poster presentation?

Participants are encouraged to submit abstracts. Visit the meeting page for more information.
